

The workflow operating system for the donation industry.

Tissue Processors · Blood Banks · Eye Banks · Organ Procurement Organizations · Birth Tissue · Recovery Agencies

01 Partner Management Secure portal for external partners. Structured data exchange, documents, audit trail.	02 Intake & Recovery Digital forms replace paper. Validation, conditional logic, linked to donor record.	03 AI Donor Screening SOP-aware eligibility engine. Match / no-match with explainable rationale.	04 DIN Assignment Rule-based, automated, unique, fully audited. One source of numbering truth.
05 Tissue Processing Digital processing forms. Workflow validation against organizational standards.	06 Quality & Release Multi-level sign-off. SOP-to-chart matching. Final compliance checkpoint.	07 Inventory & Distribution Lot tracking, graft status, allocation, distribution logs. End-to-end chain of custody.	08 Compliance & Audit AATB + FDA + HIPAA posture. Every decision auditable, every SOP versioned.

From intake to distribution, DonorIQ supports every step.

AI Document Analysis

Advanced OCR technology blending AI and traditional methods for precise text and layout extraction.

Automated Workflow

Streamlined document processing pipeline from upload to results with minimal manual intervention.

Compliance-Driven AI

SOP-based AI ensures regulatory compliance and consistency across all donor evaluations.

Scalability Across Use Cases

Easily extends to handle organ, eye, and tissue datasets, adapting to various donation scenarios.
