

Post-Op Patient Resource

Designed for use in surgeon patient portals, discharge materials, or eye bank outreach to recipients.

Your corneal transplant was made possible by an extraordinary gift.

Someone chose to donate their corneas, and an eye bank worked to make sure that gift reached you. If you've ever wondered what that process looked like — or how you can honor the person who made your surgery possible — we have resources for you.

Connect with your eye bank

Your local eye bank is your direct connection to the donation community. They can answer your questions, help you reach out to your donor's family, and share ways to get involved.
